What is Magnetic Energy ?

- Magnetic energy is strongest natural force in the universe.
- Our earth is a giant magnet and all life developed under the influence of Earth's magnetic field.
- Everything from minute cells in our body to macro Solar system is influenced by magnetic energy in universe.

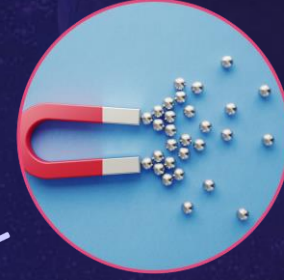

Our Body needs Magnetic Energy

Each cell has positive and negative field in DNA.

Magnetism is essential for body's electromagnetic activities and plays important role in health

Cell division is process responsible for keeping body healthy & rejuvenated.

the proper function and interaction of all systems in body Depends On constant Presence Of Adequate Magnetic energy.

The force which activates formation and division of cells is magnetic energy.

Magnetism is our Basic Need

✓ Lack of magnetic energy can induce many diseases in human body.

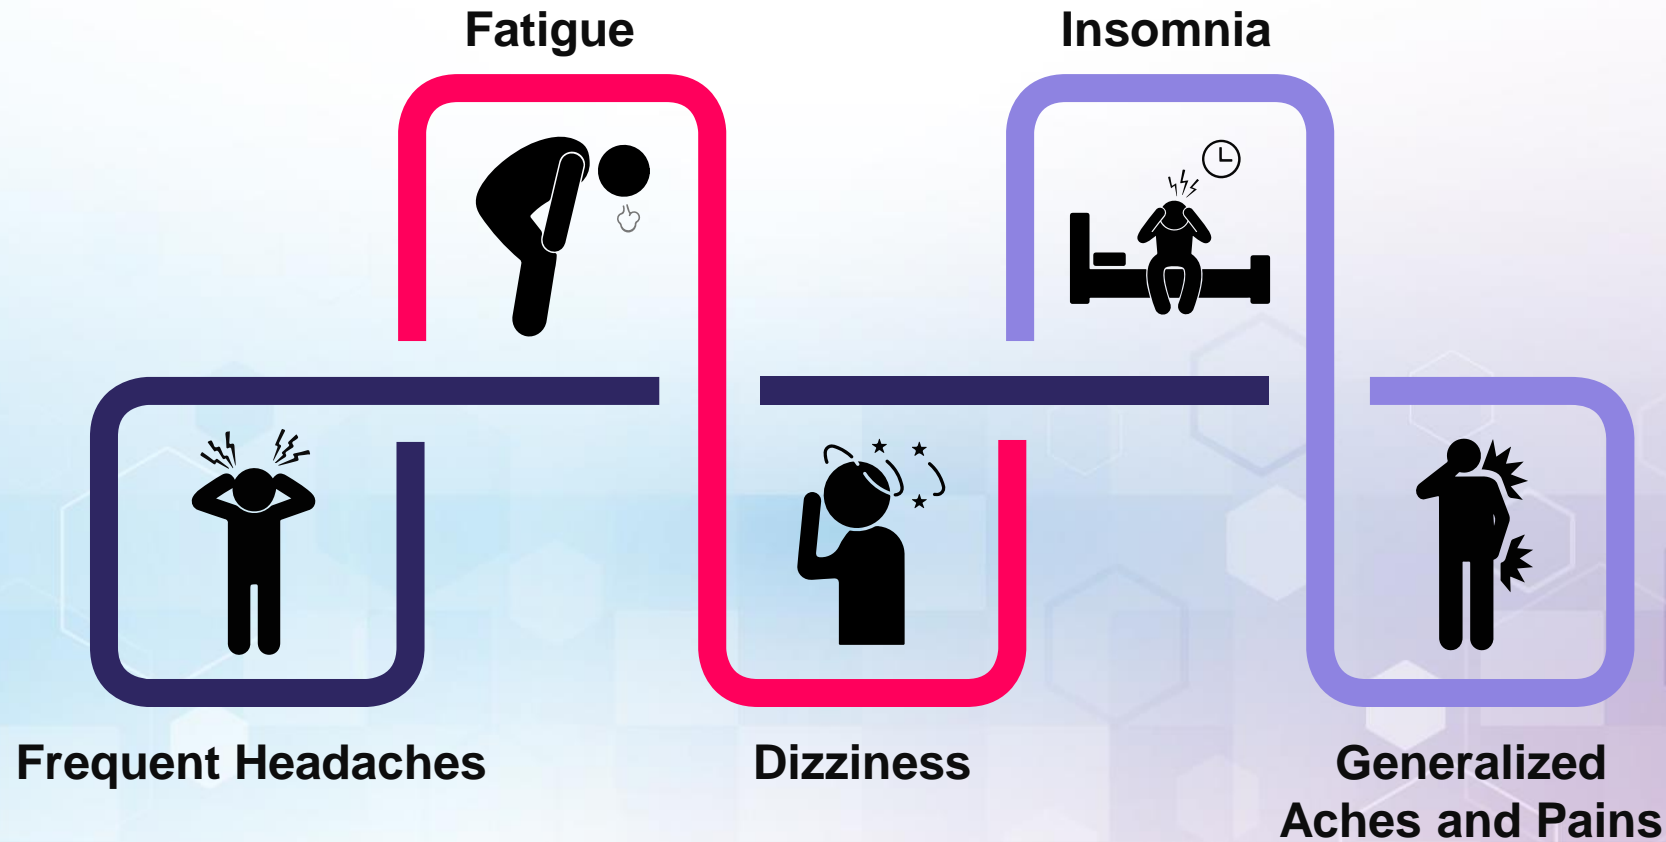

Reasons for Low Extraction of Earths Magnetism by human Body.

- We are not in direct contact with soil either in daytime or at night.
- There is always something between us and soil 24 hours like our footwear, concrete floor below us Road, bed, mattress and so many things like this which prohibit our direct contact with soil.
- Due to this earth's magnetism is always restricted and weakened before entering our bodies.
- It is important to enrich our body with bio magnetic energy externally in order to live healthy life.

**This is major reason for high illness percentage in urban areas than in villages
Where people are comparatively more in contact with soil and mother earth.**

Magnetic Field Deficiency Syndrome?

And many more diseases in future...

It is important to Enrich our body with Bio-magnetic Energy externally in order to live healthy life.

Ancient Magnetic Therapy

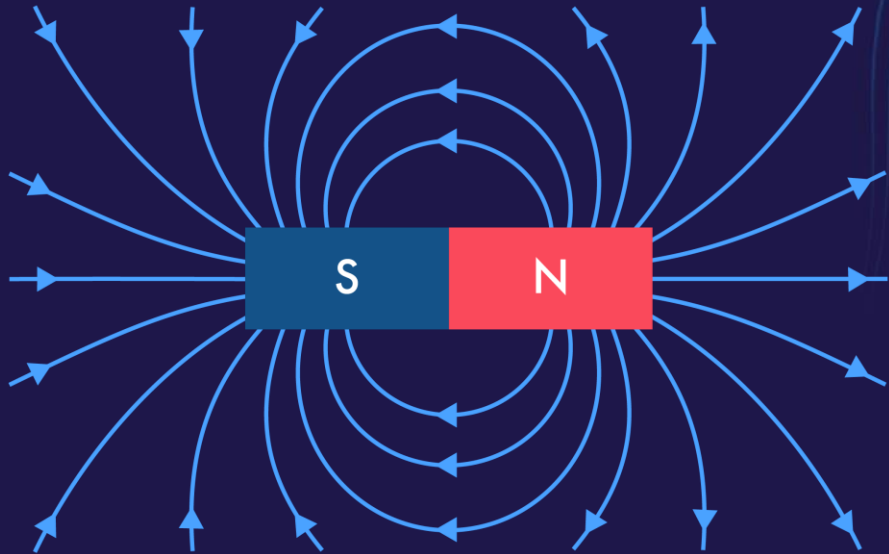

Magnetic Therapy had been very widely used in Ancient times and now it is a Proven method of treatment in Alternative Medicine.

Magnet Therapy is a holistic therapy that facilitates the body to balance **self-healing**.

Magnets have been used all over the world for thousands of years and are believed to possess healing powers.

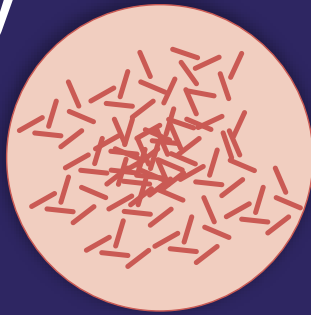

Magnetic Therapy Basic Principle

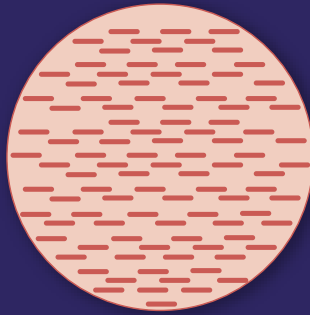

When magnets are placed on the human body, the magnetic field penetrates the skin tissues and bones. As blood contains iron, it acts as a conductor of magnetic energy in helping to increase the flow of blood and therefore increase the delivery of oxygen and nutrients to tissues. This assists the growth of healthy new cells and initiates the body to heal itself by its natural ability.
